

REMARKS

Presented in this document are two amendments to the specification and one amendment to the claims. The three amendments are presented to correct inconsistencies between the specification and the figures or to address typographical errors. In particular the first amendment to the specification adds the word "area" to maintain consistency with FIG 2A; this amendment is fully supported by FIG. 2A. The second amendment corrects a typographical error in which FIG. 2A was erroneously referenced; this amendment finds full support in the context of FIG. 2B. Finally, claim 13 has been amended for readability. No change in scope is intended and the amendment finds full support in the context of the claim itself. Accordingly, no new matter has been added.

Applicants request that the amendments be entered. No fees are believed to be due with this submission. Please apply any other charges or credits to Deposit Account No. 06-1050.

Respectfully submitted,

Date: AUGUST 10, 2007
